

Dynamic Web Templates as a Design Technique

Description of an outstanding product:

An outstanding week one project is one that has a basic master page/Dynamic Web Template as well as added controls, a master page/Dynamic Web Template with styled elements, and a well-tested master page/Dynamic Web Template with prototype content. In addition, basic page layouts for each of the main content pages have been created. A style sheet for the master page/Dynamic Web Template has been created and all of the page elements have been styled.
